Read the "Situation Wanted" columns, Mr. Business Man.

This column is the ladder of the discontented ones—for discontent nine times in ten spells ambition.

Just the young man your business needs may be appealing to you today.

Take a chance on the "ambitious employed."

We may live without conscience and live without heart;
We may live without poetry, music and art;
We may live without friends, we may live without fade,
But business today cannot live without ads.

POULTRY

MAKING WINTER FLOCK LAY

Unless Proper Quarters Are Provided Hens Will Not Produce Eggs—Mistake to Overcrowd.

By H. L. KEMPSTER, Missouri Experiment Station.
Farmers lose thousands of dollars every year because their poultry is not properly housed. Unless proper quarters are provided, hens will not lay during the winter and it is a waste of feed and time to hold them over. The most common mistake is to keep more hens than the house will hold. A better plan would be to cull the flock and comfortably house those that remain. If a poultry house is roomy, it does no harm to keep the birds shut up on stormy days. The house should be dry. This is accomplished by having a good dry floor and a good system of ventilation. Above all, the quarters should be light and clean—the house a pleasant place for the hens to live in.

The Missouri College of Agriculture

Single Comb Partridge Cochins.

gives the following prescription for hen-happiness and a full egg basket: Allow each hen four square feet of floor space.

Provide one square foot of glass to every 15 square feet of floor space. Locate the windows on the south side and place the tops not quite half as high as the house is wide.

Ventilate by placing one square foot of muslin to every 15 square feet of floor space, or by making a slit front similar to the cupolas in barns. Be sure the house is free from cracks and that there are no openings for drafts on the back, ends and roof. Build a floor eight inches higher than the surrounding ground. Fill in four inches of coarse stone, then two inches of clay and then two of dirt. This will make a dry floor.

Provide eight to ten inches of roosting space and one nest to every six hens. Cover the floor with a foot or eight ees inches of straw. Feed the grain in the straw so as to encourage exercise.

SELECTION OF BIG LAYERS

Many Difficulties in Choosing High Producing Breed—No General Agreement Yet as to Type.

There are several difficulties that surround the selection of high-producing hens. The individuals are small. Their production, compared with cows, for instance, is also small. The standard yearly profit for each hen is somewhere around one dollar. One cannot spend a great deal of time or each individual hen. So that from a general farmer's standpoint, traits, the one accurate way of getting at the big layers, are out of the question. The fact that the individuals are so small also makes it difficult for even those who have given the matter considerable attention to select by type. There has been no general agreement as to what the egg type is.

POULTRY NOTES

Have a double floor in the pigeon house.

Furnish abundant sunlight in the pigeon loft.

The more heavily you are feeding the more demand there is for charcoal. Make it an article of everyday diet.

The name "broiler" is derived from the fact that the bird is usually split down the middle and the halves broiled.

Scraps saved at butchering time make a fine egg stimulating feed in cold weather.

Feed a little hempseed to pigeons that are "going light."

The present prices for squabs are likely to be maintained for years to come.

Be careful not to overfeed the first week of fattening. It is better to feed lightly three times a day.

A "Flying" Malady.

The doctors are puzzled concerning a strange malady that has broken out at more than one aeroplane works and has in one case resulted fatally. The malady in some respects resembles yellow jaundice, and it is, rightly or wrongly, attributed to contact with an aeroplane "dope," or to inhaling its odor.

Further particulars need not at the moment be indicated, but it has been suggested that the source of the trouble may be amyl acetate, which is used as a "dope" solvent. Some mystery attaches to the affair, the precise nature of the malady not having yet been determined, in spite of close examination and analysis; and, of course, until success is attained in this direction no satisfactory precautions or remedy can be devised.

Only Wedding Gifts Assets.

"I see that Jones has failed. Has he any assets?"

"Nothing of any value. The inventory which he filed with his petition in bankruptcy shows that he had 230 wedding presents."

KNOW NOW

And Will Never Forget the Experience.

The coffee drinker who has suffered and then been completely relieved by changing from coffee to Postum knows something valuable. There's no doubt about it.

"I learned the truth about coffee in a peculiar way," says a California woman. "My husband who has, for years, been of a bilious temperament decided to leave off coffee and give Postum a trial, and as I did not want the trouble of making two beverages for meals I concluded to try Postum, too. The results have been that while my husband has been greatly benefited, I have myself received even greater benefit."

"When I began to drink Postum I was thin in flesh and very nervous. Now I actually weigh 16 pounds more than I did at that time and I am stronger physically and in my nerves while my husband is free from all his ailments."

"We have learned our little lesson about coffee and we know something about Postum, too, for we have used Postum now steadily for the last three years and we shall continue to do so."

"We have no more use for coffee—the drug drink. We prefer Postum and health."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," in pkgs.

Postum comes in two forms: Regular Postum—must be well boiled 15c and 25c packages.

Instant Postum—Is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

The cost per cup of both kinds is about the same.

"There's a Reason" for Postum.

GOLF

It is estimated there are 5,000 golf courses in the United States and Canada, with half a million players.

Frank L. Woodward, new president of the U. S. G. A., says that the present definition of the golf amateur is satisfactory enough, but that it is the methods of evading its application which must receive the attention of the men who have the best interests of the sport at heart.

The holding of the next woman's national golf tournament at Onwentsia will be a direct snub of the eastern golfers, who frankly asserted that they would not go so far West to compete.

"Pape's Diapepsin" settles sour gassy stomachs in Five minutes—Time It!

WOMAN WOULD
NOT GIVE UP

Though Sick and Suffering; At Last Found Help in Lydia E. Pinkham's Vegetable Compound.

Richmond, Pa. — "When I started taking Lydia E. Pinkham's Vegetable Compound I was in a dreadfully rundown state of health, had internal troubles, and was so extremely nervous and prostrated that if I had given in to my feelings I would have been in bed. As it was I had hardly strength at times to be on my feet and I did so was by a great effort. I could not sleep at night and of course felt very bad in the morning, and had a steady headache."

"After taking the second bottle I noticed that the headache was not so bad, I rested better, and my nerves were stronger. I continued its use until it made a new woman of me, and now I can hardly realize that I am able to do so much as I do. Whenever I know any woman in need of a good medicine I highly praise Lydia E. Pinkham's Vegetable Compound." — Mrs. FRANK CLARK, 3146 N. Tulip St., Richmond, Pa.
